

IT Operations Engineer (m/w/d)

To join our expanding team, we are looking for a IT Operations Engineer (m/w/d) in Full-time employee at our Klagenfurt location in Austria.

Your tasks

Based in Klagenfurt, you will support our global customers in the area of parking software solutions. Depending on your interests and skills, we offer various key tasks. This is particularly about:

- Direct communication with our international customers
- Management and monitoring of technical customer concerns
- Advancing the solution and expanding the knowledgebase
- Analyzing technical problems - depending on your qualifications, you can solve them directly yourself or pass them on to 3rd level support

Your profile

- Ideally a completed technical education (HTL/University/FH) or professional experience in the IT environment

Your benefits

- A permanent employment relationship with an attractive salary based on the collective wage agreement
- Flexible working hours

- Good communication skills in German and English
- High affinity for IT topics and technical understanding
- Independent and solution-oriented work
- Knowledge of Linux or SQL queries is an advantage
- Experience with SW tools such as Jira is desirable
- Meal vouchers (4 EUR per day)
- Home office (2 days per week)
- Promotion of your career through further training opportunities
- Parking with e-charging
- E-pool car for private use subject to availability
- Daily fresh fruit and coffee
- Team room with table football
- Employee events

About DESIGNA
